

Digital Hub Applied AI

Our mission: Bringing AI methods and technologies into application

Supported by

digitalLÄND

A substantial support along your AI Journey!

Since 2017, the Digital Hub Applied Artificial Intelligence (Karlsruhe) has been part of the Federal Government's de:hub initiative. The vision of the Digital Hub Applied Artificial Intelligence is to be a central networking platform as well as a nationwide contact point for (future) AI experts and AI users. Its strong network – consisting of startups, SMEs and international corporations as well as research and transfer institutions – enables the Digital Hub to support AI experts and users with tailored offers that accompany them on all paths of their AI journey: from Basic information transfer and idea generation to prototyping and implementation. As an offer of the DIZ I Digital Innovation Center Baden-Württemberg, a joint venture consisting of the CyberForum and the FZI Research Center for Information Technology and with the participation of the Karlsruhe Institute of Technology (KIT) and KIT Innovations gGmbH, its mission is to bring AI methods and technologies into application.

Our portfolio:

- Offers for AI experts and users
- Project initiation and support
- Visibility and events
- Networking and ecosystem
